

IMPEL

EA for Nature, Industry and Water

Marina de Gier/Katie Olley

Outline

- Enforcement Actions the story so far
- Results
- SWEAP
- The view from Commission
- Should/ Can EA be rolled out to other areas?

Participants

Austria	Germany	Norway	
Belgium	Greece	Poland	
Bulgaria	Hungary	Portugal	
Croatia	Iceland	Romania	
Cyprus	Ireland	Slovenia	
Czech Republic	Italy	Spain	
Denmark	Latvia	Sweden	
Estonia	Luxembourg	Switzerland	
Finland	Malta	Turkey	
France	Netherlands	United Kingdom	

• 2000 days across Europe

Inspections

• 10,000+ inspections

Detection rate

• 27% waste shipments

Violation rate

• 32% infringement

Enforcement Actions

Officer exchanges & training

Guidance

Useful & respected data!

Legislative change

Participants meet legislative requirements

Joint operations

Network
frontline officers
+ police and
customs

IMPEL Enforcement Actions 2014-2015 Project Report

Exchanges & training

Help with difficult cases

Training in Rotterdam for new inspectors

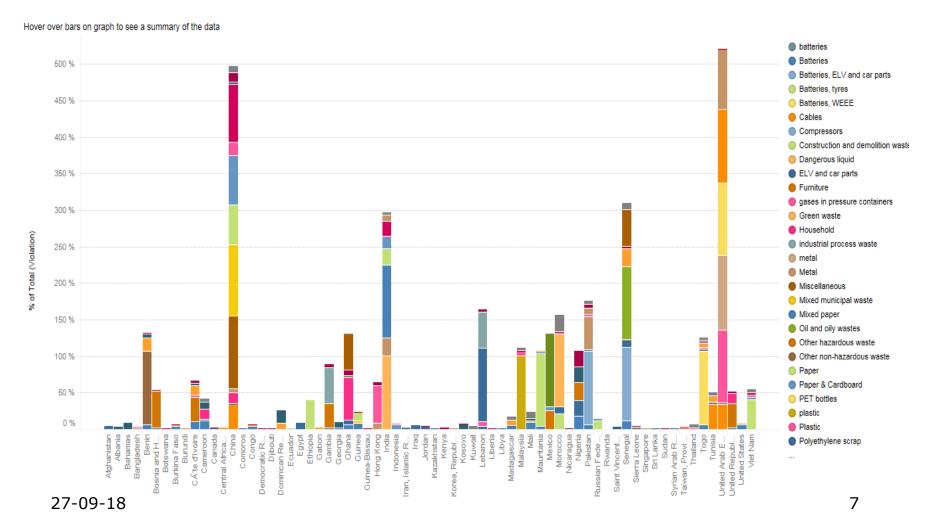

Overview of Total Inspectio

	2016	2017	Overall EA V
Admin inspections	3961	2272	6233
Physical inspections	6793	10036	16829
Waste inspections	3139	3189	6328
Waste detection rate	29%	26%	27%
Waste violations	1062	947	2009
Violation rate	33%	30%	32%

Project development

2003 to 2006	Seaport projects I & II Verification projects I & II
2006 to 2014	Enforcement Actions I, II & III
2014 to 2018	Enforcement Actions
Shipments of Waste 2018 to 2023 Enforcement Actions Project (SWEAP)	

SWEAP (2018-2023)

Replace current Enforcement Actions Project

Secure financial footing

Able to plan and implement practical improvements for frontline officers

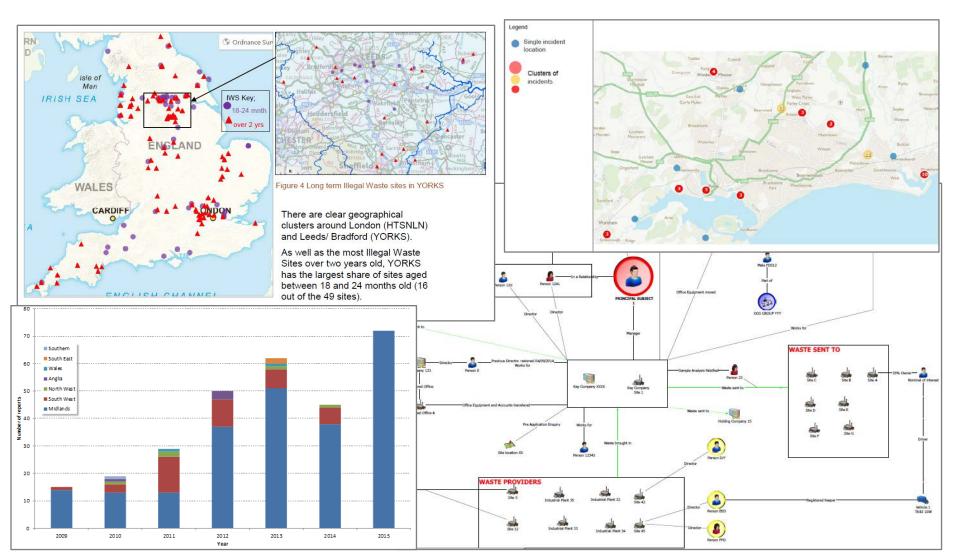

Work packages:

- 1. Capacity building and training for Customs
- 2. Co-ordinated inspections throughtout the waste management chain
- 3. Development of innovative enforcement tools
- International collaboration, communication and awareness-raising
- 5. Intelligence gathering and sharing with Europol

the Implementation and Enforcement

Example of product

Commission's view

2. Foreword

The Commission has highly appreciated IMPEL's projects to strengthen the inspections and enforcement of the Waste Shipment Regulation. This report marks the successful completion of IMPEL's latest enforcement actions which contribute valuably to combatting illegal waste shipments.

Just over ten years ago, the dumping of toxic waste from the ship Probo Koala resulted in devastating consequences for people living in the Ivory Coast. This case gave rise to an international outrage and spurred pleas to fight illegal waste

The Commission has stated:

"Good when also EA projects for nature, industry and water"

Successful ingredients of EA

or why does the Com likes EA just as much as we do?

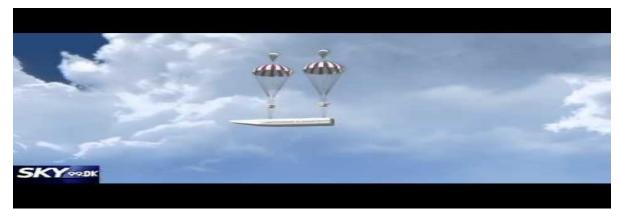

- 1. Joint inspections and exchange of inspectors
- small group, learning from each other, discussing common problems and solutions, working together on actual problems. Police and custom also involved
- 2. Easy to get involved and for countries to do inspections and report results
- 3. Analysing the results of inspections and providing useful information, and over many years (see trends)

EA for Nature, Water, Industry

Should/ can the same approach be followed?

Perhaps not realistic:

Other type of legislation, different circumstances across countries, licences in own language, etc.

EA for Nature, Water, Industry

EA for

Main challenges?

Is data gathering, analysing and sharing useful for your work?

Should emphasis be on training or joint enforcement?

EA forSuggestions

Nature? More involvement of customs, police and other regulators in exchanges and border inspections?

Industry? Gathering information how many inspections are carried out in e.g. the gas and oil branch, main violations, changes over the years, more compliance or less?

Water? Gathering information on the of inspection results regarding water/ ecological quality changes?

Nature? The number of inspections on Nature 2000 and?

You know better than we do!

Do you have any suggestions for us?
